PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in object-oriented programming, data structures, and algorithms. Skilled in developing and testing full-stack software solutions, debugging code, and solving programming problems. Comfortable working collaboratively in team environments and quick to learn new tools and technologies. Seeking to apply strong engineering fundamentals to build reliable, efficient, and high-performing software products.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science and Engineering

2024 - 2028

Pranveer Singh Institute of Technology, Kanpur | Currently in 3rd Year

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

PROJECTS

ResumeIQ: AI Resume Analyzer and Interview Assistant

- Applied sound engineering principles to design and build a full-stack platform integrating 4 core modules: resume analysis, ATS compatibility scoring, skill-gap identification, and interview preparation.
- Gathered requirements from teammates, defined feature scope, and led a 5-member team through iterative development and testing.
- Leveraged NLP to generate context-aware, personalized resume feedback and customized interview questions based on candidate profiles.
- Implemented secure authentication (JWT), resume parsing across 2 file formats (PDF and DOCX), and RESTful API integration to deliver a scalable, reliable, and user-friendly tool.
- Debugged and tested core modules through unit and integration testing to ensure consistent, error-free performance across the platform.

Kalasetu: Digital Identity Platform for Artisans

- Collaborated with a cross-functional team to design a solution giving artisans a digital identity by documenting their stories, techniques, and heritage.
- Developed a QR-code-based physical-to-digital bridge linking handcrafted products to artisan profiles, improving traceability and buyer trust.
- Applied multilingual APIs to auto-generate artisan profiles, and architected the system to scale from a small pilot to thousands of artisan profiles.
- Planned the technical approach across 3 core stages (data collection, profile generation, and QR-based product linking) to ensure a smooth end-to-end user experience.

TECHNICAL SKILLS

Programming Languages: C, Python, Java

Web and Frameworks: React.js, Node.js, Express.js, Spring Boot

Electronics and Embedded: Arduino/ESP32 Basics, GPIO Pins, Sensors

Tools and Platforms: Git, GitHub, VS Code, Arduino IDE, MySQL, Postman, Firebase

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, REST APIs, Debugging, Software Testing, Version Control, Agile Methodology, Software Development Life Cycle (SDLC), IoT Fundamentals

SOFT SKILLS AND INTERESTS

Soft Skills: Teamwork and Leadership, Communication, Time Management, Willingness to Learn

Interests: Internet of Things (IoT), Embedded Systems, Smart Systems, Artificial Intelligence

Languages Known: English (Professional Proficiency), Hindi (Native Proficiency)
